## PROJECT

### Online Messaging Application

Developed using HTML, CSS, JavaScript, and the MERN stack (MongoDB, Express.js, React.js, Node.js) to automate manual messaging systems. The app securely stores and manages data, ensuring easy access and manipulation while leveraging readily available software and hardware.

### Spring Boot Calculator Project

Built a Java calculator with basic and advanced features, including a linear equation solver and mean calculation. Verified functionality with unit tests and developed a Spring Boot calculator app, demonstrating expertise in Java and Spring Boot.

### Hunger Savior Portal

A food delivery front-end application built with Angular CLI (v16.2.8), inspired by Swiggy. It features a responsive UI, real-time order tracking, and secure payment integration via Razorpay. Developed using TypeScript, HTML, and SCSS, it connects to a Spring Boot back-end with microservices architecture.
